**Basic Cover:** Made of a durable stretch knit material that allows fluid to pass through and optimizes air exchange, keeping clients dryer as it wicks moisture away.

**Body Smart® Cover:** Designed to assist in the proper alignment and positioning of clients. With its breathable double layer, the cover provides support in the ischial area against the effects of shearing while the front of the cover offers friction to maintain hip position and encourage stability.

**Shear Smart® Cover:** Designed to provide significant relief from the effects of shearing and is an effective moisture barrier against incontinence. It offers a double layer of low shear material to allow for maximum movement on the pad.

Incontinent covers available on select cushions, call customer service for availability & pricing.
